Take-down policy

If you believe that this document breaches copyright please contact us providing details, and we will remove access to the work immediately and investigate your claim.

Downloaded from the University of Groningen/UMCG research database (Pure): <http://www.rug.nl/research/portal>. For technical reasons the number of authors shown on this cover page is limited to 10 maximum.

Contents

Chapter 1	Complement and renal transplantation: from donor to recipient. <i>Transplantation 2008 Apr 15;85(7):923-7</i>	9
Chapter 2	Crosstalk between complement and Toll-like receptor activation in relation to donor brain death and renal ischemia-reperfusion injury. <i>American Journal of Transplantation 2011 Apr;11(4):660-9</i>	25
Chapter 3	Rationale	47
Chapter 4	Local renal complement C3 induction by donor brain death is associated with reduced renal allograft function after transplantation. <i>Nephrology Dialysis and Transplantation 2011 Jul;26(7):2345-54</i>	51
Chapter 5	Systemic complement activation in deceased donors is associated with acute rejection after renal transplantation in the recipient. <i>Transplantation 2011 Jul 27;92(2):163-169</i>	75
Chapter 6	Increased renal C5a receptor expression and systemic complement activation in brain-dead donors. <i>Submitted</i>	91
Chapter 7	Targeting complement activation in brain-dead donors improves renal function after transplantation. <i>Transplant Immunology 2011 May;24(4):233-7</i>	109
Chapter 8	Protective role of complement C3 gene variants on renal transplant outcome of deceased cardiac death donor kidneys. <i>Submitted</i>	125
Chapter 9	Lectin complement pathway gene profile of the donor and recipient does not influence graft outcome after kidney transplantation. <i>Submitted</i>	143
	Summary and future perspectives	163
	Samenvatting en toekomstperspectieven	173
	Dankwoord	181
	Biografie	184
